

It's About Time

H.P. Lovecraft

Well, it's about time for the rising sun
It's about time that the deed was done
A better day's coming, that's the thing I know
You and me, brother, we can make it so And it's about time for the wars to cease
And it's about time for the cause of peace
Because we'd better find the world when the sun has grown
You and me, brother, we can overcome
We can overcome
