

# Abomination

## Totakeke

foretold in may prophecies  
global apocalypse has arrived  
those who lived, wish they were dead  
walk the live of life and death  
radiation that covers the skies  
nuclear mutants holes for eyesburnt beyond recognition  
melted flesh nature's disguise  
charred corpses ashes to dust  
malicious cries of unrelenting lustmutated victims, dwell underground  
contamination leads to starvation  
water and food supply destroyed  
chemical disease followed bydiabolical unleashment  
spewing forth an inferno of carnage  
torn wasteland of rubbish and debris  
after the bomb, nothing left to seepower hungry nations  
technology and science  
prove man's progression is really regressionwar and political violence  
have brought about the end  
blood for blood  
abomination the final godsend
