

# My Secret Place (Feat. Peter Gabriel)

## Joni Mitchell

I'm going to take you to  
My special place  
It's a place that you  
Like no one else I know  
Might appreciate  
I don't go there with anyone--but  
You're a special case  
For my special place  
For my secret place People talk to tell you something  
Or to take up space  
Guess I'm only talking  
To be talking to  
Your pretty face  
I don't talk much to anyone, but  
You're a special case  
For my special place  
My secret place I was born and raised  
In New York City  
I'm just getting used to Colorado,  
Oh street bravado  
Carry me  
Why did you bring me to  
A place so wild and pretty?  
Are there pigeons in this park,  
Muggers after dark,  
In these golden trees,  
In the secret place? I'm going to take you to  
My special place  
It's a place no amount of hurt and anger  
Can deface  
I put things back together there  
It all falls right in place,  
In my special space  
My special place
