

# Into the Unknown

## Dream Evil

Never talk to strangers, never meet their eyes  
Stay away from danger, never leave the light  
Don't head into darkness, it might be your fall

Turn away whenever evil callsSo where's the road where you can go

In the day or night, in the dark or light  
And you need to find a way somehow  
When you hear the call you want it all  
Walk into the unknown

If you want to know, you got to go and to leave safety behind

Stand on the razor's edge, out of control, when you walk into the unknownSeek the truth of living, find the way of life

Unveiling all the secrets, stand and take the fight  
When your heart is bleeding, when your soul is torn

Turn around, take another doorSo where's the road where you can go

In the day or night, in the dark or light  
And you need to find a way somehow  
When you hear the call you want it all

Walk into the unknownIf you want to know, you got to go and to leave safety behind

Stand on the razor's edge, out of control, when you walk into the unknown

Let it go, just tonight, rest your soul tonight

Set it deep, in your sleep, that's the only way to goWalk into the unknown, if you want to know  
You've got to go, and to leave safety behind

Stand on the razor's edge, out of control, when you walk into the unknown
