

Bitter for Sweet

Los Angeles Chamber Singers

Can you tell me what stopped the rain?
Where is salvation, science, saviors, tragedy?
May I lead the way into temptation?
Sirens screaming just for me and the void remains
Would you save, would you save my life
If you knew, if you knew why?
This is the last time I'm leaving without you
In silence, in silence
Could you save, could you save my life
Had the boy that you knew not died?
This is the last time I'm leaving with out you
In silence, in silence
Can you tell me what stops the pain
Self medication, science, saviors, tragedy?
How deep must we cut to reach sensation?
Find it bring it back to me, where the void remains
Would you save, would you save my life
If you knew, if you knew why?
This is the last time I'm leaving without you
In silence, in silence
Could you save, could you save my life
Had the boy that you knew not died?

This is the last time I'm leaving with out you
In silence, in silence
Walk with me my one and only
Find with me the end, the end
Walk with me my one and only, silence
Would you save, would you save my life
If you knew, if you knew why?
This is the last time I'm leaving without you
In silence, in silence
Could you save, could you save my life
Had the boy that you knew not died?
This is the last time I'm leaving without you
In silence, in silence
Could you save, could you save my life?
This is the last time I'm leaving without you
Save my life, in silence

If you knew, if you knew would you save me?
Can you tell me what stopped the rain?
Can you tell me what stopped the rain?
Can you tell me what stopped it?
If you knew, would you save me? Would you save me?
