

# Isolation

## Vallon

You arrive like a dragonfly  
Float above the grass, trembling still  
Think you might open up your heart  
Open up your heart, someday you will  
    Yes, there's always a way  
    Yes, there's always a way  
        To end this isolation  
When you rise like the Milky Way  
On a luminous night the epic unknown  
    Though I try, try to find a sign  
        Of another life, I am alone  
        And there's always a way  
        Yes, there's always a way  
        To end this isolation  
One step away from everyone  
    If you could open it up  
        You could connect it to us  
One step is more than enough  
    To get a look in  
        You could be already gone  
I wish you would take me along  
    To end this isolation  
        To end this isolation  
I try so hard to get it right  
Look for something in your eyes  
    And I see it  
But you won't let yourself feel it  
    I wait for you to make a sign  
Let the door open in your eyes  
    And I believe it  
That one day you'll step inside
