Better Place

Overflow

Let's add some light to this gloomy world
Despite the views that we once held
Yeah, yeahSometimes you have a smile
Spread across your face for about a mile
You're okay for a whileI know you want a better way
It's waiting just for you in a better placeYou've got to make a change of heart
He'll show you where to start
He'll teach you how to live
Come on and come with meBefore your life can begin
You gotta grab your cross and follow Him
What a better place this could beI wanna help you find the remedy
Be everything that you can be
It's so easyYou're always out of luck and feeling down
Your world is spinning round and round
To the groundI know you want a better way
It's waiting just for you in a better placeYou've got to make a change of heart
He'll show you where to start
He'll teach you how to live
Come on and come with meBefore your life can begin
You gotta grab your cross and follow Him
What a better place this could beYou just gotta believe
Come on, believe itYou've got to make a change of heart
Come on and get your party started
Oh, don't you know
Before your life can begin you've got to follow HimChange of heart
He'll show you where to start
He'll teach you how to live
Come on and come with meBefore your life can begin
You gotta grab your cross and follow Him
What a better place, what a better place
What a better place this could be
