

Ignition

Brian Setzer

Well she's got hydramatic hips
Lips like fluid drive
And if you don't believe me man
Just take her for a rideSome say that she's built for comfort
Others built for speed
Well she just makes my engine race
She's everything I needIgnition
She turned the key and my heart jumps
Ignition
She sure can make my spark plug pumpWell cruisin' with my baby I check out every curve
And if I say I'm out of gas you don't believe a word
Call it electricity but something is in the air
Oh when my baby kisses me sparks fly everywhereIgnition
She turned the key and my heart rocks
Ignition
She sure can make my spark plug popPull up to the starting gate you know you're doing fine
Brother you just hug that rail 'till you reach the finish lineIf you drive in the fast lane, think your cruisin' high
Check out your rear-view mirror man, let the real thing by
'Cause when I got ignition I just can't shut it down
I'll race 'till you're out of gas
I'll run you out of townIgnition
She turned the key and my heart jumps
Ignition
She sure can make my spark plug pumpIgnition
She turned the key and my heart rocks
Ignition
She sure can make my spark plug popIgnition
Ignition
