

You Can't Conceal a Broken Heart (Remastered)

[Kitty Wells](#)

You can't conceal a heart that's broken no matter what you say or do
I still recall words that were spoken the night you said that we were through
My darling I still want you near me you know I loved you from the start
You may conceal the teardrops falling but you can't conceal a broken heart
[fiddle]

You can't conceal a heart that's broken although you cry to hide you're blue
I know for me you feel no longing for in your heart there is no room
The lonesome night I sit alone dear I'm lonesome since we've been apart
I try to smile the best I can dear but you can't conceal a broken heart
