Get Up

Steriogram

Go, here we go now
Here is the excitement
Arriving, it's time, now, to try it
Get up and goI was thinking
Is it love, now?
I'm loving the passion that's inside, when we
Can you feel me?I'm alive now
I'm really living it, now
I've lost track of time but I'm still ready to
This is all rightI've been waiting
Respecting the goodness and believe its
I've always wanted
This nightTonight is the night for
My life to
I was wondering
What the point wasThat there's no other time to
I've never seen you like this
It must be the time or a sign that we should
Oh, what happened?Right now
Just gotten better, and effected our
Yeah, this feels right
Like I should be here, nowBeing apart of the things that go with
When will it stop
Don't want it to be finished
Now, I've seen how it works so I just wannaTell me I'm dumb
I'm alone, here, freaking out
Nothing else more to see
It's the power in the mindTo live it up large, in this place with the
I can tell, now
I found my flavour
And it's about to stick, so, I can move with theNo more worries
Not thinking about the stories
I gave them away
And all I want is toNow, I found it
I'll keep it close to me, now
I'm not going back to the start
I'll just get up and go
