It's All Over

Spain

It's all over now
He knew from the start
It was in the way
She walked and the way she movedIt's all over now
She told him somehow
It was in the way
She softly turned her headIt's all over now
And now she's free
Free to find another loveIt's all over now
And when she's alone
She remembers her first love
From so long agoIt's all over now
How she thinks of him
And of what it would be like
If he were to callIt's all over now
And now she's free
Free to find another love
