I Could Wait

MU330

I could wait some I could wait and you could get your
Head together we all could wait some, we could wait
And watch you crawl out of the gutter, tongue tied
Last night more lies and another fight you could taste some
You could take a taste and kill another bottle, you could taste
Some you could take a taste and we could watch you plummet
Right back to the bottom, you took my bait
Now you'll have to wait
