This City

The Rural Alberta Advantage

This city is cold and it cuts through my toque,
I file into your rust covered coupe
I don't know what we're gonna do
I don't wanna be there by you
This city explodes through the defrosted view
I don't know what we're gonna doOh, for now it's all gone
We're waiting to be right
Waiting to be wrongThis city is cold and it cuts through my toque
I'm just stuck sitting here loving you
I don't know what we're gonna do
And the city's dark tonight,
We're fine we're doing alright
And I don't wanna be stuck if I'm with youOh, for now it's all gone.
You're waiting to be right,
Waiting to be strong
Oh, giving ups going wrong,
I just want to know it's clear tonight we're done
