

A Beautiful Love Song

[Glen Campbell](#)

I'm just a poet in a word of singers
How I'd love to help you sing your song
But your whole world's filled up with your remembrance
Don't live in the past, girl - it's all gone I got some words if you've got a melody
We could sing a happy song
And I got the love if you've got the faith in me
Girl we can get along
Give me some time and I'll write you a beautiful love song
Give me some time and I'll write you a beautiful love song I know you've been lookin' for some answers
And it's kinda hard to find them all alone
But I'll take time to teach you if you let me
I just want to help you sing along 'Cause I got some words if you've got a melody
We could sing a happy song
And I got the love If you've got the faith in me
Girl we can get along
Give me some time and I'll write you a beautiful love song
Give me some time and I'll write you a beautiful love song
Give me some time and I'll write you a beautiful love song
