

Can You Take Me

Third Eye Blind

All I want right now is the time
Where we slept on the floor
You said, "Right here, right now
Is all that we're living for" I got the velocity
And all I need now is the mass
I just want you to ask Can you take me
Into days I never knew?
Let's start a riot (I want a riot)
Let's start a riot, me and you
'Cause a riot's overdue Now these days I wonder
Why we're holding back on bliss
You blast from me everything you see
I just wanna give you a kiss I want the infidel's head on a pike
Riding on my motorbike
Oh, you and me are alike Can you take me
Into days I never knew?
Let's start a riot (I want a riot)
Let's start a riot, me and you
'Cause a riot's overdue Let's get it bigger and wider
I'm the mega collider When I take you
Into days I never knew
Let's start a riot (I want a riot)
Let's start a riot, me and you
'Cause a riot's overdue Bust you out, I've come to bust you out
I've come to bust you out, I've come
Live in doubt, no longer live in doubt
No longer live in doubt, no Humbly now, oh yes humbly now
I ask for no resistance, oh, no resistance
Maybe now, oh, just maybe now
We can bridge the distance
'Cause it's so, it's so big, big Into days I never knew
Let's start a riot (I want a riot)
Let's start a riot, me and you
'Cause a riot's overdue Don't back down, don't compromise
Don't close your eyes, here it is, do or die
And you still believe the lie
You still believe the lie And the world is for the meek
And this mouse is gonna squeak
I am dying to be freaked

Yes, I am dying to be freaked
