

# Jump

Lee Ryan

There is no reason to be far apart  
We should be two sides of one beating heart  
So don't be scared to let me love you  
We're standing on the edge of something else  
Just count to ten and let go of yourself  
Somehow we'll get by, we're sky high  
So baby won't you...Jump  
Take that leap of faith  
Take that leap with me  
We can make it if you just believe  
Girl you'll never feel more alive than  
When you and I are skydiving We know that life was never meant to last  
So who cares if we're going way too fast  
Let's make the best of what life brings us  
There's no such thing as reaching up too high  
Why can't we build our castles in the sky  
Run from the rooftops, we won't stop  
Baby come on...Jump  
Take that leap of faith  
Take that leap with me  
We can make it if you just believe  
Girl you'll never feel more alive than  
When you and I are skydiving  
Jump  
Even if we fall, even if we break  
Tell me it's not worth the chance you take  
To know that for a while we were flying  
You and I skydiving  
Jump It's a cold world, full of cold places  
Full of people, wearing two faces  
You're a sure sign, of what could be  
I can go anywhere if you're with me Jump  
Take that leap of faith  
Take that leap with me  
We can make it if you just believe  
Girl you'll never feel more alive than  
When you and I are skydiving  
Jump  
Even if we fall, even if we break

Tell me it's not worth the chance you take  
To know that for a while we were flying  
You and I skydiving  
Jump
