

Love Forever

The Babe Rainbow

where'd you go with your medicine show
are you outside of the law
lose the invitation to yourself for awhile
looking towards the new horizon

love forever

reality is a technicolor dream, makes me feel like you're floating upstream
through the door
before the angels know, you're one of them

love forever

where'd you go with your medicine show
are you outside of the law
lose the invitation to yourself for awhile
looking towards the new horizon

love forever

reality is a technicolor dream, makes me feel like floating upstream
through the door
before the angel knows, you're one of them

love forever
