

# Get Black

## Blade From Jestofunk

Saving all my pennies up, trying to get some cigarettes  
But that's the way I gotta live  
And there's a girl sitting on the bus bench  
Yelling at the pigeons as the children chase the sunIt's like a movie but there's never any ending  
Summer in the city, world is ending this way  
That's why I stay so close to the action  
A parade just for my satisfaction'Cause no one knows the reason for giving us  
Summer in the city  
You better move, you better dance all night long  
'Cause I ain't coming home until the crack of dawnYou better get back, get back  
'Cause I can feel my blood pumping all night strong  
And I can love the way you wanna live  
And I can feel your heart beating next to mineAnd I can feel the heat coming up the seat  
And it's taking me away  
Into a place where nobody else is  
And we can be and be together at lastAnd that boy, well, he done lost his old ball  
He'll never be right, he's got no hope at all  
That's why I pray that the summer never ends  
And we can stay here and walk the city forever'Cause no one knows the reason for giving us  
Summer in the city  
You better move, you better dance all night long  
'Cause I ain't coming home until the crack of dawnYou better get back, get back  
'Cause I can feel my blood pumping all night strong  
And I can love the way you wanna live  
And I can feel your heart beating next to mineSaving all my pennies up, trying to get some cigarettes  
But that's the way I gotta live  
And there's a girl sitting on the bus bench  
Yelling at the pigeons as the children chase the sunIt's like a movie but there's never any ending  
Summer in the city, world is ending this way  
That's why I stay so close to the action  
A parade just for my satisfaction'Cause no one knows the reason for giving us  
Summer in the city  
You better move, you better dance all night long  
'Cause I ain't coming home until the crack of dawnYou better get back, get back  
'Cause I can feel my blood pumping all night strong  
And I can know the way you're gonna learn  
And I can feel your heart beating next to mineYou better get back, get back, get back, get back  
You better get back, get back, get back, get back  
You better get back, get back, get back, get back

You better get back, get back, get back, get back
