Liberate

Remy Shand

It's so hard to understand
you've already made you plan
i could see it in your eyes
the story that you told was so harmful and so cold
there's no way to compromise
i'm gonna liberate my soul
so don't pacify my role and my right, and my right
ooh, i've got to take control
as the future will unfold and take flight, and take flightstanding by your side
only made me realize that your truth was far from right
oh, how could i confide in a source that must divide
all the way my hands were tiedrepeat chorusbridgerepeat chorus
