

# Antarctica

FFS

I can barely feel my fingers anymore  
Since the continental drift (uh huh)  
How quickly things can shift in front of me  
All this ice flow and drift (uh huh) To know you was a gift (to know you was a gift)  
Before the continental drift (before the continental drift)  
How quickly things can shift (how quickly things can shift)  
And now Antarctica It was always t-shirt weather 'round you  
Hot wind, blowing through your hair  
It was always top-down weather with you  
So (?) somehow  
And now Antarctica  
Antarctica I can sense the coldest shoulder in the world  
Where's the thermostat controls your soul  
(uh huh) No amount of insulation will protect me  
I've got frostbite from my head to my toes I sensed that you were miffed (I sensed that you were miffed)  
I bought a thousand gifts (I bought a thousand gifts)  
I sometimes ask what if (what if)  
In Antarctica It was always Acapulco around you  
Temps kept rising somehow  
It was always (?) weather  
Sunlight glaring somehow  
And now Antarctica It was always Acapulco around you  
Temps kept rising somehow  
It was always (?) weather  
Sunlight glaring somehow  
And now Antarctica  
Antarctica It was always t-shirt weather around you  
(?) somehow  
It was always top-down weather  
Hot wind blowin' through your hair  
And now Antarctica It was always t-shirt weather around you  
It was always top-down weather around you  
And now Antarctica
