

I Swear This Is the Last Time

Calling All Captains

I don't see any other way
for you to get out of this mess and
this town is a loaded gun
with its sights on you
and you can't get out of hereTake this anyway you want to
but don't expect me to be there when you crash and burn
I've got a closet full of demons
and you're just another waiting to break freeThis is the last time I kiss this city goodbye
it's the first time I get on with my lifeI don't see any other way
for you to get out of this mess and
this town is a loaded gun
with its sights on you
and you can't get out of hereI knew who I was this morning
but that's changed so many times since then
These are the nights we will remember
and I'll hold onto that till the day I dieThis is the last time I kiss this city goodbye
it's the first time I get on with my life, fuck!I don't see any other way
for you to get out of this mess and
this town is a loaded gun
with its sights on you
and you can't get out of hereI don't see any other way
for you to get out of this mess and
this town is a loaded gun
with its sights on you
and you can't get out of hereThis is the last time I kiss this city goodbye
it's the first time I get on with myThis is the last time I kiss this city goodbye
it's the first time I get on with myThis is the last time I kiss this city goodbye
it's the first time I get on with my life
