

# Only You

## Kiss

Only you have the answers  
But the questions you have to find  
Only you know the secrets  
But the truth lies deep in your mind  
Only you are the answer  
You turn the night into day, yeah  
Only you are the manchild  
You are the light and you are the way  
Tell me the secrets  
I wanna know  
Tell me the secrets  
I wanna know only you  
Only you are the manchild  
You are the light and you are the way  
I can't believe this is true  
Why do I listen to you?  
If I am all that you say  
Why am I still so afraid?  
Only you  
Only you  
Only youIn every age  
In every time  
A hero is born  
As if by a grand design
