It's Far Better To Learn

Saosin

You'd better learn that this will not blow
Over and over
High above, they're taking over you
And you should know
I will not let you go
What is my body worth?
Was there a price set before?
There's something greater there
What is my body worth?
Was there a price set before?
It's not gonna change you
We walk along but never turn
To see what we have done
We choose our moves
So carefully for you
I will not let you go
What is my body worth?
Was there a price set before?
There's something greater there
What is my body worth?
Was there a price set before?
It's not gonna change you
What is my body worth?
Was there a price set before?
It's not gonna change you
Why believe in nothing?
Why believe in nothing at all?
Why believe in nothing?
Why believe in nothing at all?
What is my body worth?
Was there a price set before?
There's something greater there
What is my body worth?
Was there a price set before?
It's not gonna change you
What is my body worth?
What is my body worth?
