

You In a Song

[Sherry Lynn](#)

There's something on the radio I know
And it feels like home yeah it takes me home
To slow dancing in the bed of a truck til the sun comes up
Watch the sun come up
No it never fails baby I go there
Every time I turn it on I find you in a song And I catch myself humming along
Cause there ain't no sunshine when you're gone
And you're always on my mind
Every time I turn that dial
I can hear you singing off key to stand by me
Oh you sound so sweet with the melody
No I can't go on if that radio's on
Yeah I find you in a song yeah It doesn't matter what station I play
And what they're singing it's all true
Cause ever since you walked into my life
No matter where I am I feel you
Pull me close to you beneath that summer moon
Baby it's your love no I can't get enough And I catch myself humming along
To this crazy little thing called love
And you light up my life every time I turn that dial
I can hear you singing off key to lean on me
Oh you sound so sweet with the melody
No I can't go on if that radio's on
Yeah I find you... In every note in every situation
I don't want these songs to ever quit playing
