

Living for the Night (Ao Vivo)

Viper

Between dusk and day
Before the sunrise
The city will begin to live its crimes Millions if you ask
It happens everywhere
Every little corner has its tale Windows are the eyes
That witness without soul
Watching in the silence what is done I'm a part of this
Violence is my friend
Walking on the line of life and death Spirits walk the streets
Siren sounds alone
Screaming out the lyrics of my song I have no other life
Concrete is my cage
All my disillusion turns to rage I'm living for the night
Though we have to fear it
Where life is just a game
That you have to win Living for the night
When death surrounds you on and on
All the time it's near
I'm longing to be free He even knows my name
He wants no waste of time
I know that killing is his game
And I am the prize Our footsteps sound alone
I know he's just behind
I feel the panic in our hearts
Beating very loud I turn my eyes to him
The night is very dark
He's got a knife and I know
Cause I saw the blade Between the light and shade
Between the night and day
Between my life and death
I only feel the blade Between dusk and day
Before the sunrise
The city will begin to live its crimes Millions if you ask
It happens everywhere
Every little corner has its tale Windows are the eyes
That witness without soul
Watching in the silence what is done I'm living for the night
Though we have to fear it
Where life is just a game

That you have to winLiving for the night
When death surrounds you on and on
All the time it's nearLiving for the night
Though we have to fear it
Where life is just a game
That you have to winLiving for the night
When death surrounds you on and on
All the time it's near
