

Red Alert

Saxon

We were on the Russian border
When the news began to break
Of a nuclear reactor melting down
Sending deadly clouds of dust Into the atmosphere
Falling down like rain upon the ground We were laying in the sun
Listening to the radio
When someone said you'd better get inside
We didn't know how serious The situation was
That many people to the north had died Red alert, red alert
Screaming in my head
There's something I'm not sure of going down Red alert, red alert
Screaming in the night
That fallout seems to follow me around We made out way to Hungary
Got ready for the show
Thinking we were safe there
From the storm But the deadly cloud was high above
Taken by the wind
Spreading like a plague across the land
A threat you couldn't see Nothing you could feel
Something evil floating in the air
Look towards the east
For the danger yet to come For the Earth
We make a silent prayer Red alert, red alert
Screaming in my head
There's something I'm not sure of going down Red alert, red alert
Screaming in the night
That fallout seems to follow me around We were on the Russian border
When the news began to break
Of a nuclear reactor melting down
Sending deadly clouds of dust Into the atmosphere
Falling down like rain upon the ground Red alert, red alert
Screaming in my head
There's something I'm not sure of going down Red alert, red alert
Screaming in the night
That fallout seems to follow me around
