

Sadhguru - Original Mix

Pettra

If you generate a powerful thought
You can make certain things happen
You can have a certain power over other people and situations
This will give you a high
But it is not an ultimate solution to life
You maybe affective in the world
But within yourself you still a mess
Whatâ€™s the point?

But within yourself you still a mess
Whatâ€™s the point?

You maybe affective in the world
But it is not an ultimate solution to life
You can use your thought to create physical situations
But you cannot existentially move on

Right now, thatâ€™s what you are doing with see with education and other things
Your thought is developed to some extent
You can earn money and be successful
Where everybody thinks you are great
But you are a mess within yourself

You want to look with ten peopleâ€™s eyes
That's not going to change the experience of your life
If you sit here, you are absolutely blissful
This is what changes the experience of your life

What somebody else thinks about you
Why is it so important?
Or what you think about yourself
Why is it so important?
Whatever you think about yourself
Whatever the whole world thinks about you
Has no existentially relevance

If you generate a powerful thought
You can make certain things happen
You can have a certain power over other people and situations
This will give you a high

But it is not an ultimate solution to life

You maybe affective in the world

But within yourself you still a mess

You want to look with ten people's eyes

That's not going to change the experience of your life

If you sit here, you are absolutely blissful

This is what changes the experience of your life.
