

For All Time

Maxine

Thinkin about the ways that you fill me up even when you can't be here right by my side

I won't forget what you do for us and I say a little prayer for you every night

We keep eachother going everyday it's true

I don't know where I'd be if I were without you

Everything you say to me I know is so sincere

You may be gone but I can hear your whisper in my ear When you come back home were gonna be together

It'll be like sunshine weather, always you and me together, gonna make it last for all time I'm waiting for that

special day that you'll show up and I know that it will be like love at first sight

When we get alone baby you know whats up, I'm gonna make sweet love to you all through the night

I'll start with kisses really softly on your face

We'll keep the music nice and slow to keep the pace

It'll be like heaven when we both become one

Finally united baby it has been so long What would I ever do if I didn't have you?

How would it really be?

Would I just go crazy?

Waiting for you to be living this life with me

I need you by my side When you come back home were gonna be together

It'll be like sunshine weather, always you and me together, gonna make it last for all time We've stuck together

through our troubles for so long

People doubted our relationship but now were strong

You are the one that seen the light inside me

You always keep it real and make it so easy When you come back home were gonna be together

It'll be like sunshine weather, always you and me together, gonna make it last for all time
