Night Rocker

David Hasselhoff

City lights are comin' on one by one
So are the stars in the sky
We're saying goodnight to the settin' sun
That's where now world comes aliveI am the night rocker
I wanna rock you all night long
I am the night rocker
I wanna love you in a song
It's a sweet lullaby
And I know you want to fly
So come, let's fly away
I am the night rockerKiss me and world is so cool and bright
It's so much music in the street
And when I'm walking you down the boulevard
Something comes alive in meI am the night rocker
I wanna rock you all night long
I am the night rocker
I wanna love you in that song
It's a sweet lullaby
And I know you want to fly
So come, let's fly away
I am the night rockerI don't mind the morning light
I love it shining down on me
But there's something about the night
It feels so right, just you and meI am the night rocker
I wanna rock you all night long
I am the night rocker
I wanna love you in that song
It's a sweet lullaby
And I know you want to fly
So come, let's fly away
I am the night rockerI am the night rocker
I am the night rocker
Let's fly, let's fly awayI am the night rocker
I am the night rocker
I am the night rocker
Let's fly, let's fly away
