Politician

Agnostic Front

You think that you're always right
Throw your line and see what bites
Need to clarify your way with violence
In our minds each dayNow the time is here
Excuses made from fear
What we want from you nothing but the truth
Sitting down behind your desk with offices to representWith democrats and anarchist
Never know what to expect
What we want today is to find another way
Someone we can choose don't make things right for youSo we follow you like sheep
Well, I don't think you fit the lead
Voted in and voted outTime to see what life's about
Citizens revenge, this is where it ends
No more lies from you now your time is throughJustify it, justify it now
