What Is Love

Candace Leca & Michael Paglia

Somewhere in between we forgot what it means
I don't remember how you fell for me
In a single soul where the love is composed
Left high and dry to die I suppose

What is love and where does it live
I don't remember how it felt to give
When I'm gone it's you I'll miss
Baby we weren't born for this
Baby we weren't born for this

Memories drift away like a bottle at the bay
You hold on tight but they seize to stay
Two souls pulled apart and they're forced back to the start
I always knew this was the hardest part

What is love and where does it live
I don't remember how it felt to give
When I'm gone it's you I'll miss
Baby we weren't born for this
Baby we weren't born for this

Just when you think you know
The moons move and tell you no
You're left lost with no home
For your heart to go

What is love and where does it live
I don't remember how to give
When I'm gone it's you I'll miss
Baby we weren't born for this
Baby we weren't born for this
