Castles In The Air

B*Witched

Here my head up in the clouds
I feel I'm spinnin' around
Dreams will come and go but this is here to stay
So forever this wayHold me now, hold me now
And say the things you say
Hold me now, hold me now
I praySo here we are at the start of this road
Together building castles in the air
Words we don't need, without you I don't breathe
Forever building castles in the airSo softly like a sigh
Sea where the white horses ride
It all seems so real, a feeling deep inside
So our time will go onHold me now, hold me now
And say the things you say
Hold me now, hold me now
I praySo here we are at the start of this road
Together building castles in the air
Words we don't need, without you I don't breathe
Forever building castles in the airSo here we are at the start of this road
Together building castles in the air
Words we don't need, without you I don't breathe
Forever building castles in the air
