Alzheimer's Disease

Messiah

For fifty-two years
We have been married
We've had a lucky life
But now the problems have begunShe's really changed, I can't understand my wife
What's happened with her mind
She keeps forgetting things
I realize the degeneration of her memory
Her lack of independence
Distractedness, personality decline
Obstructions of recollectionsThe years pass slowly
A lot has changed in my life
She's living with a persecution complex
My wife's a total physical wreckShe's regressing more and more
Her behaviour is like infancy
I see only a grown-up foetus
