

Burnout

Beartooth

I want free
I want change
I want it written on my grave
Another [?] living in his cage I'm sick of being angry at all the wrong things
Keeping my head down to get through another day
How much time have I spent yelling at people that don't exist?
I'm sick of being hopeless at all the wrong times
Living a let down, living a lie
I can't be wrong, not this time I just wanna
(Live free) They won't get the best of me
(Live free) I don't need your sympathy
You may spark the flame
But these scars will not remain
You'll never burn me out It's really getting hard writing negative songs
Beating myself up to get another word out
How much time have I lost, yelling about all the pain I've felt?
There's gotta be an answer, gotta be a fact?
Find the pieces, take the risk
I won't go down, not like this I just wanna
(Live free) They won't get the best of me
(Live free) I don't need your sympathy
You may spark the flame
But these scars will not remain
You'll never burn me out You'll never burn me out (Live free) They won't get the best of me
(Live free) I don't need your sympathy (Live free) They won't get the best of me
(Live free) I don't need your sympathy
You may spark the flame
But these scars will not remain
You'll never burn me out You'll never burn me
