

# Go For It All

T. Mills

I know it will be okay, I just need to hear you say  
When nothing really goes your way  
Tomorrow is a brand new day  
Lemme help you ease your mind, Ima make you realize  
That tonight's your night I just want you to fly like a first class ticket on a mission through the sky  
Never listen to the lies, keep you vision to the moon  
Action speaks louder than the whispers in the room  
I know critics just assume you will never get to do  
All the things you really love, such a pessimistic view  
Well let me tell you like mama told me  
Everything comes back it's never always gon' be  
So mama never home, and papa never sober  
You gotta keep climbin, the top is never closer  
The trip is like a flight that'll take you to the light  
And tomorrow is brighter if you make it through the night, right? You got it, they can never take it  
They just gonna hate it, cause they can never make it  
Better days are coming in this thing called life  
When the rain go away a rainbow will say it's alright I know it will be okay, I just need to hear you say  
When nothing really goes your way  
Tomorrow is a brand new day  
Lemme help you ease your mind, Ima make you realize  
That tonight's your night  
So baby let's go for it all  
I know it will be okay, I just need to hear you say  
When nothing really goes your way  
Tomorrow is a brand new day  
Lemme help you ease your mind, Ima make you realize  
That tonight's your night  
So baby let's go for it all Wow, you can finally smile  
We done made it to the sky, we ain't never coming down  
Remember all the nights you was wishin on a star?  
I told you if you fight it will get you through tomorrow  
See, you just gotta stay, and that'll bring your blue skies out  
And make all your fake friends go away, all they do is throw shade  
It's time to get the sunshine back and watch all these grey clouds go away  
Okay, you got it, they can never stop it  
They just gonna hate it, cause they can never top it  
And even if you block it there's gotta be a way out  
If hard work pay off there's gotta be a pay out

Stay outside of the blizzaks, stack your own brizzocks into a building  
When you was feelin like givin up you never did  
So I just came to let you know it if you never hear  
It's alright(Chorus)Keep your eyes to the skies (and baby we'll go for it all)  
Don't ask why, that's just life (so baby let's go for it all, oh oh, oh woah)(Chorus)
