Paradigm

Kyshera

If you want to understand
The real politics of man
From the Empire to the San
Humanity is ruled by gangs

How many differences
Can you see when you scratch the surface
In the rule of crime & the rule of law
Just see your rulers as a gang, nothing more

And pay your protection to Tax man in return
For token gestures that service the lie
Dont cause no tension or Police man footsoldier
Show who's defence they really provide

And if you choose, its from the few trustable
To nurture the rule, from whom they're corruptable

Every Military & institution
Industry & Corporation
Secret society & justice system
Is a self advancing organism

If you want to understand
The emancipation of man
Learn by your oppressors hand
That power lies with the strongest gang

Black market crackdown is market monopoly
Illegality serves its maker
Turf expansion in Foreign policy
There's no question that violence cannot answer

Like Selfish genes, build a body
Bodies build Fraternities
And the maneouvers of entangled interests
Is how the world is run no less

Every society in every nation
Monarchy & Religion

Democracy & Revolution
Is a self advancing organism
