

You Went Away

Earth, Wind And Fire

You went away
'Cause you said that you can't stand me
So I went away
I was sure that you can't stand me Well, I don't think we have to be like this forever
Is there more to life than love and being together You went away
'Cause you said you couldn't love me
I went away
'Cause all I do is love you Well, I don't think we have to be like this forever
There's more to life than love and being together My loud guitar comes in
My thumpin' drums come through
When my loud guitar comes in
My thumpin' drums come through
My loud guitar comes in
My thumpin' drums come through Well, I don't think we have to be like this forever
There's more to life than love and being together There's more to life than love and being together
Is there more to life than love and being together
I went away
