

# Worry All the Time (Alt Mix Version)

**Denison Witmer**

Lately I been waking to  
The bluest stars that I once slept through  
The morning hangs like open chords  
That I fill in with my own thoughts and wordsI used to worry all the time  
But I slowed down to live my life  
To live my life nowCollege campus and warmest grass  
We sit and watch the people rush to class  
When did we to decide that life had to be  
All fasts and cheques, that we lost mysteryWe used to worry all the time  
But we slowed down to live our lives  
To live our lives now
