Crack the Big Sky

Spock's Beard

We played the liberation game
They gave a war, someone came
We dropped the torch, easy
Let's all go down and dance in the rainAnything could happen then
Which scared the king and all his men
We better kill this feeling
We've been wrong before
It could happen againRain came and soon became
A crack in the big sky
Night stayed and music played
We could not shame this high
After we came down we hit the ground
Crack the big sky, crack the big skyWhat was all the fuss about
(Let's all get out and work for nothing)
Let's make stuff we can't live without
(It's alright to believe in something)
We'll make up your meaning
Let's get you right in, you can't be left outRain came and soon became
A crack in the big sky
Night stayed and music played
We could not shame this high
After we came down we hit the ground
Crack the big sky, crack the big skyLight the light's on Lincoln Lake
Sorry boys, it was our mistake
Power makes you sleazy
Now you've lost your sight
Ain't it a shame? Ain't it a shame? Ain't it a shame?Rain came and soon became
The color of the sky
Night stayed and music played
We could not shame this highFriends gathered 'round each other
No one was alone
And you want to run and tell your brother
That you've finally found a home
But you can't find a phoneRain came and soon became
A crack in the big sky
Night stayed and music played
We could not shame this high
(We could not shame this high)Rain came and soon became
A crack in the big sky

(A crack in the big sky)
After we came down we hit the ground
Crack the big sky, crack the big sky
