

Inside a Boy (album Version)

My Brightest Diamond

Inside a boy
I found a universe
And in his eyes
Are a thousand stars
On a dark sky We are clouds, we are whispers
Like fawns and shape-shifters
Our edges can never be found out
No, our edges keep moving further out We are stars colliding
Now we crash
Like lightening into love
Love In his arms
Im unwinding
Under his kiss
I'm falling into love We are stars colliding
Now we crash
Like lightening into love We are stars colliding
Now we crash
Like lightening into love, love Love, love
Love, love, love, love, love
