

# Safer than Love

## Bell X1

Advisory - the following lyrics contain explicit language:

You wanna snap every thread that's unraveling  
If you're not careful you'll have nothing left on  
You keep checking your dam and your barriers  
Smart arse and your taser-tongue  
I hate to see you close all these avenues  
You cut and run when push comes to shove  
You say I'm not being facetious  
But it's safer than love  
What could be safer, safer than love?  
What could be safer than love?  
What could be safer, safer than love?  
What could be safer than love?  
You get the fear after two weeks of squeezing  
Remember, breathe in and breathe out  
You say a girl eats two kilos of lipstick  
In her lifetime and for what?  
What could be safer, safer than love?  
What could be safer than love?  
What could be safer, safer than love?  
What could be safer than love?  
What could be safer, safer than love?  
What could be safer than love?  
I'll be the gin in your cistern  
Yeah, I'll be whatever you need  
I'll be the gin in your cistern  
I know you never believed those sisters  
When they told you about those patent shoes  
I hope someday you catch your reflection  
And see how beautiful you are  
What could be safer, safer than love?  
What could be safer than love?  
What could be safer, safer than love?

What could be safer than love?  
Safer than love, safer than love  
Safer than love, safer than love  
Safer than love, safer than love  
Safer than love, safer than love  
Safer than love, safer than love
