Incense And Candles

Prince

Baby, ooh
(Yes, let's go)
Come on
I've been waiting for you, baby, all night long
(I've been waiting for you, baby, all night long)
So I could get somebody to play this song
(Come on)
The jam has got a beat like it's making love
(The jam has got a beat like it's making love)
'Cuz you're the only one I've been thinking of, whoa
(Oh, yeah)
Come into my room of incense and candlesc
I've got something that you won't know how to handle
You can tell me, uh, uh, but you know how this man do
I'ma want it all night long
Come on, come on
I'ma want it all night long
I'm glad we're compatible, mature and grown
(Mature and grown)
'Cause this is not nothing something you can do alone
There's a dance floor but we can use a table, yes, we can
I've got to have a partner that's willing and able
(Willing and able)
Come into my room of incense and candles
I've got something that you won't know how to handle
You can tell me, uh, uh, but you know how this man do
I'ma want it all night long
Once you try to seduce me, it grows and grows
Your mind will never deny what your body knows
I know you want to take off all your clothes
But please, don't do it
I got a cool idea my darling, let's go outside
I wanna smother you with something shiny as the rims upon my ride
I want to look for the milky way and uh, when eye find it
I'm gonna make you scream my name as if it was divine
(Prince)
But we both know that we gotta praise the one who made ya
Give props to your mama for the healthy food she must have gave ya
For the meek at heart these words they might sound like a sinner

But the truth is that you're sitting on every one of your dinners
But that's fine 'cause I'm blind, about blind as a cat in the dark
It might come at two in the morning after roaming in the park
Hard to understand, always changing plans, harder than hell to handle
One scent alone make it worth your while, the price of Prince's candle
All night
Circles of flowers or pyramids of sand
Violet colored diamonds
You got to understand
Incense and candles
Wherever you can
You got to make this woman
Lust for this man
Come into my room of incense and candles
I've got something that you won't know how to handle
You can tell me, uh, uh, but you know how this man do
I'ma want it all night long
Come into my room of incense and candles
I've got something that you won't know how to handle
You can tell me, uh, uh, but you know how this man do
I'ma want it all night long
Come into my room of incense and candles
I've got something that you won't know how to handle
You can tell me, uh, uh, but you know how this man do
I'ma want it all night long
Come into my room of incense and candles
I've got something that you won't know how to handle
You can tell me, uh, uh, but you know how this man do
I'ma want it all night long
