

# Heaven (Little By Little)

## Theory of a Deadman

Now don't you be afraid  
We can always talk about it  
No need to medicate  
'Cuz I know you're strong without it You got me through the days  
When I thought I couldn't face it  
Let me count the ways  
The love we have you can't replace it Just hold on, I'm not that strong There's a little piece of heaven  
Right here where you are  
The fact that you keep trying  
Is what sets you apart Help me find the reason  
And I'll help you find the way  
To get rid of all your pain  
Little by little, day by day Now you're far away  
And I'm alone to cry about it  
It's not a better place  
When you die and leave me here to stay Hold on, I was never that strong There's a little piece of heaven  
Right here where you are  
The fact that you keep trying  
Is what sets you apart And help me find the reason  
And I'll help you find the way  
To get rid of all your pain  
Little by little, day by day You'll get stronger  
If you need me I'm not far away  
So just hold on, I'll help you find the way  
I'll help you find the way There's a little piece of heaven  
Right here where you are  
The fact that you keep trying  
Is what sets you apart Help me find the reason  
And I'll help you find the way  
To get rid of all your pain  
Little by little, day by day Little by little, day by day  
Little by little, day by day  
Little by little, day by day  
Little by little, day by day
