

Friend Like Me

Cuete

Pinky promise
Its gonna be alright
Its gonna be alright
Its gonna be alright
Its gonna be alright Many late nights when shes all alone
She always call me up on the phone
Begging me to come and spend the night
Because she wants to rub me in her honeycomb What she need is just a friend like me
What she need is just a good friend like me
What she need is just a friend like me
What she need is just a good friend like me Told her friends that I treat her right
And I love to vibe all day
Feels so good just to be around
A lotta times she dont want me to go away What she need is just a friend like me
What she need is just a good friend like me
What she need is just a friend like me
What she need is just a good friend like me After all you cant deny
I took her where her feels
Cant go on, you cant pretend
Thats why shes asking me again What she need is just a friend like me
What she need is just a good friend like me
What she need is just a friend like me
What she need is just a good friend like me Its gonna be alright
Its gonna be alright
Its gonna be alright
Its gonna be alright
Its gonna be alright What she need is just a friend like me
What she need is just a good friend like me
What she need is just a friend like me
What she need is just a good friend like me What she need is just a friend like me
What she need is just a good friend like me
What she need is just a friend like me
What she need is just a good friend like me What she need is just a friend like me
What she need is just a good friend like me
What she need is just a friend like me
What she need is just a good friend like me What she need is just a friend like me
What she need is just a good friend like me
What she need is just a friend like me

What she need is just a good friend like me
True
