

The Power of the Written Word

Sacred Reich

Take the chance to manipulate
Their truth is simply what they create
They'll put words inside your mouth
Have no chance to spit them out
What you read
What you see
What you think
From their thought
From their view
From their ink
Opinions expressed are their views
Colored versions of the truth
It is fine to say what you think
Why believe every word you read
What you read
What you see
What you think
from their thought
From their view
From their ink
Don't believe a word they say
you know it never could be true
Anything they do or say is only meant
to mislead you
Don't believe a word they say
They're only trying to get control of you
Take the chance to manipulate
Their truth is simply what they create
They'll put words inside your mouth
Have no chance to spit them out
What you read
What you see
What you think
From their thought
From their view
From their ink
