Follow the Sun

Regine Velasquez

There was a time when I lived my life
Thinking only of the things that would bring me down
And all the while what I didn't know
Is that I never learned to take the time to look around
There's a little good in everyone
And sometimes it takes a little work to see the sun
If you try you may find your life has just begun
Don't you run
Don't you runIf you're feeling lost
If you wanna be free
If you feel like your world is tearing up at the seams
Remember there's light
If you wait till the dawn
You may walk through the clouds
But to carry on
You've got to follow the sunThere was a time when I lived my life
Thinking only of the things that would bring me down
And all the while what I didn't know
Is that I never learned to take the time to look around
There's a little good in everyone
And sometimes it takes a little work to see the sun
If you try you may find your life has just begun
Don't you run
Don't you runIf you're feeling lost
If you wanna be free
If you feel like your world is tearing up at the seams
Remember there's light
If you wait till the dawn
You may walk through the clouds
But to carry on
You've got to follow the sunListen, baby
This world may be crazy
Sometimes you'll feel like losing the game
But there's always a reason to keep on believing
Everyone is not the same
(But if you appreciate the things you have today
You will find the way)Wow..If you're feeling lost
If you wanna be free
If you feel like your world is tearing up at the seams

Remember there's light
If you wait till the dawn
You may walk through the clouds
But to carry on
You've got to follow the sun
