

New Torch

Feist

You are, you are
You are everything in time and space
Forget the face you knew You are, you are
This was written in the afternoon
The ancient runes of you Take a trip into the sky with me
Fly with me You are, you are
You are everything I've always feared
And disappear from view Take a trip into the sky with me
Fly with me Be mine through time
This way leads into the garden green
Some nights I've seen you here Take a trip into the sky with me
Fly with me
