Burn This City

Sonic Syndicate

are we alive?
because i heard a rumor
that the day we died was yesterday
so are we rotting now?
cant find our graves?well they created a lie
built out of structure and routine by robots
but this night were taking the virus to themburn this city to let them know were here
burn this city to reinstall the fear
how can i sleep when you pull focus
right before my eyes
still they find another way to put a different gun to our heads
and so i take a breath theres plenty time to sleep when im dead
is this the only way its ever gonna be?
right before my eyes...dont wanna think about the end
when this ride is just getting started
roads uncharted
or is this end of the line? (line!)
im not giving lessons
lessons how stars are forged
i just keep my finger on the trigger
and blow em away one by one
so can we all scream? (yeah!)
loud enough to awaken
the zombies of society
who control these times
burn this city to let them know were here
burn this city to reinstall the fear
how can i sleep when you pull focus
right before my eyes
still they find another way to put a different gun to our heads
and so i take a breath theres plenty time to sleep when im dead
is this the only way its ever gonna be?
right before my eyesand i still want to see the light (see the light)
shining in front of my eyesrunning's easy
where will we go - who knows?
dont look back as long as I've got you well make itburn this city to let them know were here
burn this city to reinstall the fear
how can i sleep when you pull focus
right before my eyes

still they find another way to put a different gun to our heads
and so i take a breath theres plenty time to sleep when im dead
is this the only way its ever gonna be?
right before my eyesburn this city to let them know were here
burn this city to reinstall the fear
now i see the turning point is
right before my eyes
