

# Better Than That

## Marina and The Diamonds

You're just another in a long line of men she screwed  
Just another in a long line of men she knew  
And yeah she did, yeah she did what she wanted to do  
Like all the boys before  
Another dream come true It's a power, it's a power, it's a power move  
And while I'm not quite sure what she's trying to prove  
They all say she's got low self-esteem  
So, why is she looking like the cat who got the cream But you, you can do better than  
You can do better than that I know you've been feeling sad  
I've got no right to be mad, mad  
But you can do better than that  
And I know that you're not to blame  
You just got caught in a game, game  
But you can do better than that  
Better than that  
Better than that, ooh  
Better than that  
Better than that  
Better than that, ooh She's the apple of everybody's eye  
With an angel voice, devil in disguise  
Got a sour face like a poisoned fruit  
That the boys can taste 'til they're out of use And she'll network 'til her dreams come true  
Even if it means getting into bed with you  
Everybody's friend, does it ring a bell  
I know a little too much, but I'll never tell But you, you can do better than  
You can do better than that I know you've been feeling sad  
I've got no right to be mad, mad  
But you can do better than that  
And I know you've been feeling down,  
You're always out on the town, town  
But you can do better than that  
Better than that  
Better than that, ooh  
Better than that  
Better than that  
Better than that, ooh Well, I guess it's just what humans do  
Hook up with other people 'til it all falls through  
And when it's over, they go out and try to heal their pain  
Hook up with another lover, do it all again

I'm not passing judgment on her sexual life  
I'm passing judgment on the way she always stuck her knife  
In my back ever since we were starting out  
Suspicious from the start, I always had my doubts about you  
But you, you can do better than  
You can do better than that  
I know you've been feeling sad  
I've got no right to be mad, mad  
But you can do better than that  
And I know that you're not to blame  
You just got caught in a game, game  
But you can do better than that  
Better than that  
Better than that, ooh  
Better than that  
Better than that  
Better than that, ooh
