# Distant Lights

## Ivy

Many streetlights flicker out, don't you want to know what it's about
Take me for a ride, let's check it out, maybe you'll be right, I have no doubts
You can never tell just what I thought, never learned a thing that you were taught
Something in the way we never talk, maybe it's okay we're better off
I should let you go
I should let you go
I should let you go
I should, I should let you go
I should let you go
I should let you go
I should let you go
I should, I should let you go
I should let you go
I should let you go
I should let you go
I should, I should let you go
Distant lights, distant sound, distant cries, distant until now
Just in time, listen now, distant cries, distant laughter
I want to know
I want to know
I want to know
See you looking up, don't speak too loud, only like a [?] can save you now
Sit there in your rut just safe and sound, sun is in the sky but going down
Thought I'd take a moment to have a try, tell you what I think, don't you wonder why?
Everything between us comes to this, don't want to be cruel, but I can't resist.
I should let you go
I should let you go
I should let you go
I should, I should let you go
I should let you go
I should let you go
I should let you go
I should, I should let you go
I should let you go
I should let you go
I should let you go
I should, I should let you go
Distant lights, distant sound, distant cries, distant until now
Just in time, listen now, distant cries, distant laughter
